Sire: Lego
AI Code: LN3095

Dam: Greensons Oisive

MGS: Sokrates

Ear Tag: UK232449500179

Breeder/Farmer

We are very excited to have this homozygous polled Limousin bull as part of our Signature Beef line up. Theoden provides an attractive option to customers who are looking to introduce polled genetics into their herds without compromising on important management and phenotypic traits. This young sire carries two copies of the F94L Myostatin gene and exhibits great length and width. Theoden also possesses desirable EBV figures for birthweight and calving ease, making this bull a great choice for pedigree and commercial breeders. This sire carries a Semen Royalty for pedigree registrations.
